| <input type="checkbox"/> Property appraisal | <input type="checkbox"/> Roof system design | <input type="checkbox"/> Space planning / programming |

General Statement of Professional Experience (written by firm)

Stephen Blatt Architects is a small, versatile firm experienced in public and private projects, with concentrations in educational, residential, and institutional facilities. School facility planning and design is a major area of concentration; since the firm's inception in 1976, we have been involved in more than 62 public school projects. These encompass masterplanning school campuses, far-reaching renovations, strategically located additions, sustainable design and highly complex planning for phased construction. Facilities include elementary, middle, high, and K-12 schools. Our staff of 7 includes 5 licensed Architects and a team of skilled CAD operators. We have also assembled an experienced team of independent consultants, providing services of civil engineering, landscape architecture, cost estimating, structural, mechanical, and electrical engineering.
